New York City	April 26	Fort Lee, NJ – United Nations Peace & Planet March/Rally

"In the 70th year of the nuclear age, possession of nuclear weapons does not prevent international disputes from occurring, but it makes conflicts more dangerous"
Ban Ki Moon, UN Secretary General

The 2015 Nuclear Non-proliferation Treaty Convention is meeting at the United Nations on April 27 to continue talks regarding the banning and elimination of more than 17,000 nuclear warheads worldwide.

The New England Peace Pagoda and the Walk for a New Spring are joining activists and concerned citizens from around the world in demanding honest and forthright dialog from world leaders in meeting the demands of the treaty.

This year's walk will visit communities in nine states and the District of Columbia in an effort to bring awareness of the terror of nuclear weapons and to encourage people to come to NYC, April 26th for a Peace and the Planet Mobilization which will be supported by a Global Peace Wave.

The US is spending more than \$30 Billion yearly to maintain our nuclear arsenal, which we must never use, While 1 in 30 children in America are homeless.

Please join us as a walker or host in your community as we move together to change the paradigm, embrace the children and preserve the planet.
